This is a draft position statement for discussion. This does not represent the views of the Committee and should not be cited.

µg Sb/kg
bw/day Micrograms of antimony per kilogram of body weight per day

APT Antimony Potassium Tartrate

ATSDR Agency for Toxic Substances and Disease Registry

bw Body Weight

COT	Committee on Toxicity of Chemicals in Food, Consumer Products and the Environment
DWI	Drinking Water Inspectorate
EROD	Ethoxyresorufin-O-deethylase
EU	European Union
GST	Glutathione-S-transferase
HBGV	Health-based guidance value
LOAEL	Lowest Observed Adverse Effect Level - the lowest dose in a study at which adverse effect(s) are observed.
mg	Milligram
µg	Microgram
MRL	Minimal Risk Level - an estimate of the daily human exposure to a substance that is likely to be without appreciable risk of adverse non-cancer health effects over a specified duration of exposure
NOAEL	No Observed Adverse Effect Level - the highest administered dose at which no adverse effect has been observed.
NTP	National Toxicology Program
POD	Point of Departure
ppm	Parts per million

Sb Antimony

TDI Tolerable Daily Intake - an estimate of the amount of a contaminant, expressed on a body weight basis (e.g., mg/kg body weight) that can be ingested over a lifetime without appreciable health risk.

UF Uncertainty factor

UKHSA United Kingdom Health Security Agency

WHO World Health Organization
