

Joint Expert Groups

To support the FSA's SACs outside the EU, we have created three new JEGs for regulated products, that work to the same principles as our SACs. The four SACs will continue to provide risk assessment advice for risk-based standards and controls, while the JEGs will tackle most work required for regulated products. The three new JEGs focus on:

[Joint Expert Group on Animal Feed and Feed Additives \(AFFAJEG\)](#)

[Joint Expert Group on Additives, Enzymes and other regulated products \(AERJEG\)](#)

[Joint Expert Group for Food Contact Materials \(FCMJEG\)](#)
