

COMMITTEE ON TOXICITY OF CHEMICALS IN FOOD, CONSUMER PRODUCTS AND THE ENVIRONMENT (COT)

Potential toxicological risks from electronic nicotine (and non-nicotine) delivery systems (E(N)NDS – e-cigarettes). Second draft statement.

1. During 2018 and 2019, the COT reviewed the potential toxicological risks from electronic nicotine (and non-nicotine) delivery systems (E(N)NDS – e-cigarettes). A first draft statement bringing together the discussions and conclusions of the Committee during this period was discussed at the January 2020 COT meeting.
2. The amendments requested have now been incorporated in the second draft statement attached at Annex A, with the changes made since January provided in tracked changes.
3. The sections on propylene glycol and glycerol remain under discussion and will be updated after the meeting.
4. After discussion in January the section on nicotine has had further revision and Members are requested to check the wordings of these conclusions in particular

Questions for the Committee

5. Members are invited to comment on the second draft statement, and in particular:
 - To consider the amendments made to the section on nicotine.
 - Is the Committee content to agree the text of the document as it stands, other than the sections on propylene glycol and glycerol, except where amendments in these sections could influence the COT conclusions?
